creamy lipsticks give a soft finish to the mouth. Another common cause of irritation is lanolin, a wool product often found in creams, lotions, and hair dressings. You can now buy hair spray, waving lotion, and shampoo completely lanolin-free... and just as effective. Many oils, particularly those derived from lemons and almonds, go into the scented toilettries you use. In the manufacture of hypoallergenic perfumes and scented products, only those are used that have little chance of causing sensitivity. Another plus... most of these allergen-free products are available in scented or unscented varieties.

CONTACTS HELP YOUR MAKEUP AND HAIR-DO!

QUESTIONS AND ANSWERS ON CONTACT LENSES:

- Q. How do contacts help a woman's makeup and hair-do?
A. After she spends hours on her hair and dress and makeup, the effect is not spoiled by defiguring spectacles. Also, it gives her a much wider choice in hats and earrings.
Q. Are contact lenses comfortable?
A. There are no nerves on the surface of the eye, where the contact lens floats. Eyelids can feel contacts at first, but wearers soon get no sensation from contacts, and may wear them 24 hours a day.
Q. What are my chances of being able to wear contacts?
A. Your chances are 85%, as 8 1/2 people out of 10 who try contact lenses can wear them. What it takes mainly is some patience and the ability to accept a new idea.
Q. How much do contact lenses cost per year?
A. The cost per year may run lower than spectacles, as one contact lens prescription should last a lifetime, compared to the cost of 5 or 10 sets of glasses and frames during a lifetime.
